2.2 – Empathy Map Canvas

Food ordering behavior has changed significantly with the rise of online food delivery platforms, mobile applications, and digital payment systems. Consumers increasingly prefer ordering food online due to its convenience, time-saving benefits, and access to a wide variety of restaurants and cuisines. Their purchasing decisions are influenced by factors such as food quality, pricing, promotional offers, customer reviews, delivery speed, and overall service experience. Understanding these behaviors helps restaurants and food delivery platforms improve customer satisfaction and build long-term loyalty.

An Empathy Map Canvas provides valuable insights into consumers' thoughts, emotions, motivations, challenges, and expectations throughout the food ordering process. It highlights how customers interact with food delivery services, what influences their decisions, and the factors that contribute to positive or negative experiences. These insights enable businesses to develop customer-focused strategies that enhance service quality and strengthen customer relationships.

Key Findings

What Consumers Think and Feel

- Want convenience and quick access to food.
- Seek value for money and attractive discounts.
- Prefer quality food and reliable delivery.
- Expect a smooth and hassle-free ordering experience.

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

- Worry about food quality and delivery delays.

What Consumers See

- Food delivery apps and restaurant options.
- Promotional offers and loyalty programs.
- Customer ratings and reviews.
- Social media advertisements and influencer content.
- Healthy and specialty food trends.

What Consumers Say and Do

- Compare prices and offers across platforms.
- Read reviews before placing orders.
- Use digital payments and order tracking.
- Share ratings, reviews, and recommendations.
- Frequently order during busy schedules and social occasions.

What Consumers Hear

- Recommendations from friends and family.
- Online reviews and customer testimonials.
- Influencer suggestions and social media trends.
- Advertisements promoting discounts and deals.
- Discussions about food quality and delivery service.

Consumer Pain Points

- Delayed deliveries and incorrect orders.
- Hidden charges and delivery fees.
- Poor food quality or packaging issues.
- Limited customization options.
- Difficulty obtaining refunds or customer support.

Consumer Gains and Expectations

- Fast and reliable delivery service.
- High-quality food and proper packaging.

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

- Affordable pricing and attractive offers.
- Easy-to-use applications and secure payments.
- Personalized recommendations and loyalty rewards
