CHAPTER – III REQUIREMENT ANALYSIS

3.1 – Customer Journey Map

The **Customer Journey Map for Food Ordering Behaviour and Consumer Trends** illustrates the complete process a consumer follows when ordering food online, from recognizing a need for food to becoming a loyal customer and recommending the service to others. It helps identify customer interactions, experiences, emotions, expectations, and challenges at each stage of the food ordering journey.

The journey begins when consumers recognize the need for a convenient meal and explore various food delivery applications and restaurant options. They then compare menus, prices, ratings, reviews, delivery times, and promotional offers before selecting a restaurant and placing an order. During the delivery stage, customers closely monitor order status and evaluate factors such as delivery speed, food quality, packaging, and service reliability. Positive experiences lead to customer satisfaction, repeat purchases, and loyalty, while negative experiences may result in dissatisfaction and switching to alternative platforms.

Key Stages of the Customer Journey

- **Need Recognition:** Customer identifies the need for food due to hunger, convenience, or time constraints.
