

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

TEAM ID	SWTID-2026-9834
PROJECT TITLE	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
MAX MARKS	5 MARKS

CHAPTER – IV PROJECT DESIGN

4.1 – Problem Solution Fit

1. Customers have diverse food preferences, making demand prediction difficult.
2. Analyze ordering patterns to identify popular cuisines and dishes.
3. Restaurants struggle to optimize menus based on customer demand.
4. Use trend analytics to recommend high-demand food items.
5. Businesses lack visibility into customer spending behavior.
6. Develop dashboards to track average order value and spending trends.
7. Customer retention is challenging due to changing preferences.
8. Monitor repeat orders and loyalty patterns to improve engagement.
9. Large volumes of order data are difficult to analyze manually.
10. Implement Tableau and SQL-based analytics to generate actionable insights and support data-driven decisions.
