

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

TEAM ID	SWTID-2026-9834
PROJECT TITLE	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
MAX MARKS	5 MARKS

4.2 – Proposed Solution

1. Collect food ordering data from customers, restaurants, and delivery platforms.
2. Integrate order history, payment records, ratings, and feedback into a centralized database.
3. Clean and preprocess data to ensure accuracy and consistency.
4. Analyze customer preferences, ordering frequency, and spending patterns using SQL.
5. Identify popular cuisines, peak ordering times, and emerging food trends.
6. Develop interactive Tableau dashboards to visualize consumer behavior insights.
7. Track key performance indicators (KPIs) such as total orders, revenue, and customer satisfaction.
8. Segment customers based on purchasing habits and preferences for targeted marketing.
9. Generate automated reports to support restaurant and business decision-making.
10. Provide data-driven recommendations to improve customer experience, operational efficiency, and revenue growth.

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

Proposed Solution (10 Lines)

1. Collect food ordering data from customers, restaurants, and delivery platforms.
2. Integrate order history, payment records, ratings, and feedback into a centralized database.
3. Clean and preprocess data to ensure accuracy and consistency.
4. Analyze customer preferences, ordering frequency, and spending patterns using SQL.
