

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

TEAM ID	SWTID-2026-9834
PROJECT TITLE	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
MAX MARKS	5 MARKS

4.3 – Solution Architecture

1. **Data Sources:** Collect data from food ordering platforms, customer profiles, restaurant systems, and payment gateways.
2. **Data Ingestion Layer:** Import order, payment, delivery, and feedback data using Excel, CSV files, and APIs.
3. **Data Storage Layer:** Store structured data in a centralized MySQL/SQL Server database.
4. **Data Processing Layer:** Clean, transform, and aggregate data using SQL queries.
5. **Customer Analytics Module:** Analyze customer preferences, order frequency, and spending behavior.
6. **Trend Analysis Engine:** Identify popular cuisines, peak ordering periods, and emerging food trends.
7. **Business Logic Layer:** Calculate KPIs such as total orders, revenue, average order value, and customer satisfaction.
8. **Visualization Layer:** Create interactive Tableau dashboards and reports for stakeholders.
9. **Reporting Module:** Generate automated reports and actionable insights for decision-making.
10. **Decision Support System:** Enable restaurants and food delivery businesses to optimize operations, marketing strategies, and customer experience through data-driven insights.
