

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

TEAM ID	SWTID-2026-9834
PROJECT TITLE	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
MAX MARKS	1 MARK

5.4 – Team Management Tool for Agile Planning (Jira)

1. Jira was used as the primary Agile project management tool for this project.
2. It helped organize project activities into manageable tasks and sprints.
3. Project requirements were recorded and maintained in the Jira backlog.
4. User stories were created to define project objectives and deliverables.
5. Tasks were assigned to team members with specific deadlines and priorities.
6. Sprint planning sessions were conducted to schedule project activities.
7. Jira boards provided a visual representation of task progress.
8. Tasks moved through stages such as To Do, In Progress, Review, and Done.
9. Team members updated task statuses regularly to ensure transparency.
10. Jira facilitated collaboration through comments, attachments, and notifications.
11. Progress tracking helped monitor milestone completion and project performance.
12. Sprint backlogs were used to manage workload efficiently.
13. Issues and bugs were logged and tracked for timely resolution.
14. Burndown charts were used to measure sprint progress.
15. Reports generated by Jira supported project monitoring and decision-making.
16. Regular sprint reviews helped evaluate completed work and future plans.
17. Retrospective meetings identified areas for process improvement.
18. Jira improved communication and coordination among team members.
19. The tool ensured timely completion of project tasks and deliverables.
