

CHAPTER – VI

PROJECT DEVELOPMENT

6.1 – Pre-Requisites

Tableau is a useful data visualization and business intelligence tool that helps us turn raw data into easy-to-understand charts, dashboards and interactive reports. It is widely used for businesses, analysts and researchers to make sense of complex information and support better decision-making.

Installation

Let's install Tableau in our local machines.

Step 1: Tableau Website

Go to the official website of Tableau and find the "Products" menu.

Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits

Step 2: Tableau Products

Tableau provides various ways to use its features which includes:

- **Tableau Cloud:** Cloud-based analytics platform, fully hosted without server management, for data analysis and secure sharing.
- **Tableau Server:** Self-hosted platform for on-premises or cloud deployment, giving full control over data and analytics environment.
- **Tableau Desktop:** Authoring tool used to create visualizations and dashboards, supporting offline and deep data exploration.
- **Tableau Next:** Future-focused AI and modular analytics platform integrating smart workflows and quicker insights.
- **Other Products:** Tableau Prep (data cleaning), Tableau Public (free public visualizations), Tableau Mobile (mobile access).

We will download the desktop version.

Step 3: Select the Tableau Desktop

We will select the Tableau Desktop option and then there we can have two option:

- Start Free Trial
- Buy Now
