

CHAPTER – XI

FUTURE SCOPE

11.1 - Future Scope

1. Integrate Artificial Intelligence (AI) to predict customer preferences and ordering behavior.
2. Implement Machine Learning models for personalized food recommendations.
3. Enable real-time analytics to monitor consumer trends and demand fluctuations.
4. Incorporate social media sentiment analysis to understand customer opinions and preferences.
5. Develop predictive demand forecasting to help restaurants optimize inventory and staffing.
6. Expand the system to analyze regional and global food consumption trends.
7. Integrate IoT-enabled delivery tracking for enhanced customer experience and operational efficiency.
8. Use customer segmentation techniques for more targeted marketing campaigns and promotions.
9. Build mobile and cloud-based dashboards for anytime, anywhere access to insights.
10. Enhance decision-making with advanced business intelligence and predictive analytics to drive growth and customer satisfaction.
